MARK DEVEREUX PROJECTS

Mark Devereux Projects represents a new model of working with artists, with each individual's objectives at the core of our ambitions. Central to this ethos is bespoke artist development. This is reactive and responsive to each artist's requirements and can include strategic planning, mentoring programmes, critical engagement and production.

Founded on Director, Mark Devereux's vast experience and personal attributes and supported by Co-Director and artist Liz West, Mark Devereux Projects is positioned within a much-needed area between artist and gallerist. Taking a selfless and listening approach to his work with artists, Devereux combines his broad interests within the visual arts with his inquisitive nature and passion to get the very best from the artists he supports. Taking the pressure away from a commercially driven structure, we put the emphasis on the artist's talents and ambitions.

Through our expansive networks and relationships with industry professionals, galleries and organisations throughout the UK, Mark Devereux Projects broker relationships, facilitate projects and offer services to artists. Running from our central base in Manchester, UK, Mark Devereux Projects is peripatetic, working with artists and developing projects throughout the UK and internationally.

Representing artists, their practices and careers is our primary focus. Nurturing and developing artists over the longer-term is integral to our work and we offer an alternative model of representation by paying, commissioning and supporting artist's growth.

Complimenting our programme of represented artists, we also provide bespoke information, support and advice via our MDP Associates scheme. Focused on all areas of artistic practice and career development, MDP Associates provides a comprehensive and tailored support service for artists throughout the UK, allowing us the opportunity potentially to add further artists to our represented artist roster in the future.
